

October 22, 2015

The Honorable Thad Cochran  
Chairman  
Committee on Appropriations  
U.S. Senate  
Washington, DC 20510

The Honorable Barbara Mikulski  
Vice Chairwoman  
Committee on Appropriations  
U.S. Senate  
Washington, DC 20510

The Honorable Roy Blunt  
Chairman  
Appropriations Subcommittee on Labor,  
Health and Human Services, Education  
and Related Agencies  
U.S. Senate  
Washington, DC 20510

The Honorable Patty Murray  
Ranking Member  
Appropriations Subcommittee on Labor,  
Health and Human Services, Education  
and Related Agencies  
U.S. Senate  
Washington, DC 20510

Dear Chairman Cochran, Vice Chairwoman Mikulski, Chairman Blunt, and Ranking Member Murray:

The 195 undersigned organizations and institutions representing patients and caregivers, health providers, faculty and students, scientists, policy professionals, employers, and insurers are very concerned about the future of the Agency for Healthcare Research and Quality (AHRQ) given the proposed termination of the agency by the House Appropriations Committee and the proposed 35 percent cut to the agency's base budget by the Senate Appropriations Committee. We understand lawmakers face difficult choices in funding myriad priorities with increasingly limited resources, but deep cuts to AHRQ in the current fiscal environment are pennywise and pound foolish. As you work to enact final spending legislation for fiscal year (FY) 2016, **we hope Congress will work together to enact sequestration relief and restore AHRQ's budget authority to \$364 million.**

AHRQ is the only federal research agency with the sole purpose of producing evidence to make health care safer; of higher quality; more accessible, equitable, and affordable; and to ensure that the evidence is understood and used. AHRQ-funded research, tools, and datasets are being used in health settings across the nation to help us understand and improve a complex and costly health system so that we can achieve better outcomes for more people at greater value. AHRQ's research and data help Americans get their money's worth when it comes to health care. We need more of it, not less.

We know difficult budget decisions must be made, but cutting AHRQ takes our country in the wrong direction. Our nation spends \$3 trillion annually on health care – the largest share of which are federal purchases through Medicare, Medicaid, the Federal Employees Health Benefits Plan, insurance exchanges, TRICARE, and veterans' health care. Americans deserve reliable information on how to deliver the best possible care, at the greatest value, with the best outcomes. AHRQ-funded health services research provides those answers. Without AHRQ and the health services research that can determine what treatments work best, for whom, and in

what settings, the cures and treatments developed by the National Institutes of Health (NIH) will fall short on their promise to patients, and effective prevention strategies developed by the Centers for Disease Control and Prevention (CDC) will fail to reach Americans where they live, learn, and work.

We recognize the reduction in AHRQ's budget authority is largely a function of the historically low and grossly inadequate allocation provided for health research and other critical programs under the sequestered spending caps. But without a dedicated funding stream for AHRQ's important work, it's misguided to assume that other agencies would absorb this portfolio given pressures they face in fulfilling their own specific mandates amidst budgetary constraints. Health services research—through AHRQ—needs a dedicated funding stream. It's the optimal way to ensure the generation of evidence and data to make the practice of health care safer, more effective, and more affordable for all Americans.

For more information on the Friends of AHRQ, contact Lisa Simpson at 202.292.6700 or [lisa.simpson@academyhealth.org](mailto:lisa.simpson@academyhealth.org).

Sincerely,

AACC
